

Capitalize on Crop Potential with a Superior Source of N & K

FOLI-GRO® KAP® 3-0-20 is a unique foliar potassium source that contains three high-performance components that impart superior crop responses.

NDEMAND® POLYMER NITROGEN

- Rapid uptake
- Excellent crop safety
- Humectant property that absorbs atmospheric moisture keeping nutrients in solution longer on treated surfaces for superior uptake
- Rapid conversion to amino acids upon absorption

POTASSIUM ACETATE

- Drives photosynthesis, sugar translocation and starch formation
- Regulates stomatal function
- Acetate component promotes drought tolerance and energy functions in plants
- Shown to be superior form of potassium for foliar uptake in university study

FOLI-GRO KAP, the superior energized source of foliar potassium for California nut crops.

FOLIAR ABSORPTION OF POTASSIUM AFTER 48 HOURS FROM ORGANIC AND INORGANIC K CARRIERS

% K Absorption

Journal of Plant Nutrition, 9(2), 143-157 (1986)

SEEING IS BELIEVING➤

SEAPLANT EXTRACT SYNERGY WITH POTASSIUM FERTILITY

- Promotes tolerance to abiotic stress events—temperature extremes, drought
- Enhances tank mix nutrient performance
- Advances yield potential

RESPONSE TO SEAPLANT EXTRACT FOLIAR APPLICATIONS IN ALMONDS

Average of 6 replicated trials

Yield (lb/A)

RESPONSE TO FOLIAR APPLICATIONS OF POTASSIUM ACETATE IN ALMONDS

Average of 5 replicated trials

Yield (lb/A)

TIMING AND RATES

Timing of treatments should be based on crop nutrient demand, prevailing environmental conditions, plant tissue analysis data or other information that indicates a need for fast-acting, supplemental nitrogen or potassium

TIMING	RATE (GAL/A)
Bud swell to early bloom	1-1.5
Post-bloom to preharvest	1-2
Post-harvest to early leaf drop	2-5
