

Control Volatilization & Maximize The Power of N[®]

- **Protection well past 14 days**
- **Ammonia volatilization protection**
- **Designed for surface applied, broadcast and shallow-incorporated UREA and UAN nitrogen**

Get the most out of your nitrogen investments with NDURE[®] 2.0, an innovative, patented liquid formulation that has optimized cold weather handling properties and quicker drying times. NDURE 2.0 slows down nitrogen loss, giving more time for urea to be incorporated into the soil. NDURE 2.0 prevents urea hydrolysis and the rapid pH spike caused by ammonia, minimizing NH₃ gas formation and maximizing the nitrogen growers pay.
