

GDU to Mid-Silk 1315

Pollination for Maturity Medium

HYBRID HIGHLIGHTS

- True flex, dual-purpose type hybrid with consistency across yield environments
- · Best performance on the book-ends; Western Cornbelt and Eastern Cornbelt
- Low green-snap risk and strong Goss' Wilt allows good Western movement
- · Exceptional stalk strength
- · Good overall disease package
- · Best performance at moderate populations

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, post-emergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Corn trait technology incorporated into these seeds is commercialized under license from Syngenta Seeds, LLC. Herculex® Technology incorporated into these seeds is commercialized under license from Corteva Agriscience LLC.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.
