

Maximize the Power of N[®]

NDURE[®] DCD slows nitrification and leaching of nitrogen fertilizer for below-ground protection. Retaining nitrogen in the ammonium form reduces the potential for losses caused by leaching and/or denitrification.

NDURE DCD + REDUCED N PROGRAM = SIGNIFICANT RESULTS

Note: Data shows **34% greater** biomass at harvest over the standard (low rate) treatment and **10% greater** biomass over the standard (med rate) treatment
