

# Bring the Heat

## Increased Uptake for Quicker Burndown

- Water conditioning alternative to ammonium sulfate
- Conditions water, mitigates harsh effects of hard water
- Nonionic surfactant for increased spreading and wetting
- Quicker burndown of targeted weeds

With its unique blend of water conditioners and a proprietary surfactant, CYNDER® increases uptake of active ingredient(s), allowing for a quicker burndown of targeted weeds. CYNDER is ideal for use with weak acid herbicides such as glyphosate, paraquat, dicamba, and 2,4-D formulations. The recommended labeled rates for CYNDER are 1-4 qt/100. Rates can vary depending on the hardness of water used in the spray solution.
