

Set Your Crop in Motion

TILL-IT® LAUNCH leverages KILO® technology and mixing flexibility for a fast start and increased yield potential for your crop. Superior solubility in-furrow with fully chelated zinc increases early season development and growth for higher yield potential.

KILO technology is built with potassium acetate, which is absorbed faster than other foliar applied K sources. A mix of superior solubility and plant uptake make TILL-IT LAUNCH better than other K sources for foliar, soil, or applications with irrigation.

GUARANTEED ANALYSIS

Total Nitrogen (N)*	7.00%
7.00% Ammoniacal Nitrogen	
Available Phosphate (P ₂ O ₅)*	23.00%
Soluble Potash (K ₂ O)*	2.00%
Zinc (Zn)*	0.30%
0.30% Chelated Zinc	

DERIVED FROM: Ammonium Polyphosphate, Potassium Acetate and Zinc EDTA.

TILL-IT LAUNCH BENEFITS

Built for flexibility
Blend with PURIC® and NUTRIO® technologies for in-furrow applications or with UAN as a 2x2 application

Potassium regulates movement of water, nutrients, and enzymes in plants

KILO® technology is incredibly soluble, available potassium, increasing early development in tandem with phosphate

High analysis and lower salt index drives early season plant vigor

Fully chelated zinc for maximum tank mix stability and uptake efficiency
