

Stay In Tune With Your Crop's Nitrogen Needs

- **Highly adaptable biological that can thrive in various soils and climates**
- **Provides seamless compatibility with a wide range of fertilizers and chemicals; caution advised in extreme heat and dry conditions**
- **Flexible application options: suitable for pre-plant, in-furrow, pre-emerge, and early post**

NUTRIO® N-TUNE™ is an innovative biological product that fine tunes your nitrogen needs through enhanced nitrogen fixation, improved mineralization, and optimized nutrient uptake, leading to increased yield potential. Derived from a naturally occurring beneficial bacteria capable of converting atmospheric nitrogen to ammonia, NUTRIO N-TUNE serves as a supplement to synthetic nitrogen, providing a steady supply of N throughout the growing season.

PREVENT N DEFICIENCIES

120 units of N

54PN24CNSD1

120 units of N plus NUTRIO N-TUNE @ 1 qt/A

GUARANTEED ANALYSIS

CONTAINS NON-PLANT FOOD INGREDIENTS:
Paenibacillus azotofixans.....5.5 x 10⁵ CFU/ml

NUTRIO N-TUNE BENEFITS

Constant N source
 Produces up to ½ lb of nitrogen/day

Improves nutrient efficiency
 Enlarges roots, stimulates nitrogen assimilation, and fixes nitrogen into ammonia

Go-anywhere formulation
 Works across a wide range of pH, temperatures, and even in high salinity soils

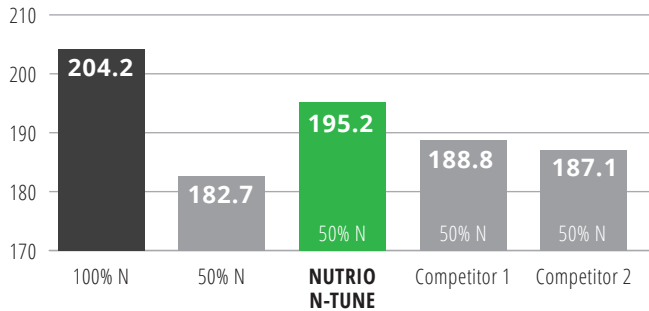

Hardy formulation
 Survives in a wide range of environments longer than competitor products

FINE TUNE YOUR NITROGEN NEEDS

Yield (bu/A)

PDF237004WI01, PDF237004IL04, PDF237004MI05

When N was a limiting factor in corn yield, NUTRIO N-TUNE proved to increase yield over the reduced N control and biological competitors across multiple plots.

Even with a 50% nitrogen reduction, NUTRIO N-TUNE shows:

+ 12.5 bu/A increase over reduced N control

+ 6.4 bu/A increase over competitor products with reduced N programs

Have peace of mind knowing NUTRIO N-TUNE provides an added boost when nitrogen needs fall short, leading to greater yields and ROI. Always work with your local agronomist to enhance your nitrogen program.

NUTRIO N-TUNE is built to provide more nitrogen, especially later in the season, when grain fill is most critical.
