

Improve Your Turf With Advanced Water Technology

AQUATE® PRO L is a multi-function soil surfactant utilizing Advanced Water Technology to help turf managers confidently address the challenges of water repellency, localized dry spot (LDS), and inconsistent hydration.

By enhancing infiltration and improving the soil's ability to retain and redistribute moisture, AQUATE PRO L promotes healthier turf and more efficient water use—day in and day out.

The new formulation offers increased rate flexibility to fit a variety of program strategies and growing conditions, and its advanced blend is designed to perform without the immediate need for watering-in—giving you more control without compromising effectiveness.
